

## Vital-10®

Vital-10® is a broad-acting, 10-species probiotic formula that offers comprehensive benefits for gastrointestinal function. Probiotics are beneficial living microorganisms that support healthy gastrointestinal and immune system function. Most diets are deficient in the essential probiotics needed to maintain health. In addition, the normal intestinal balance of microorganisms can be disrupted by stress, disease, poor nutrition, toxins, and medications, such as antibiotics, immunosuppressants, and gastric acid inhibitors, resulting in intestinal and systemic health disturbances. Routine probiotic nutritional supplementation can support the body in restoring and maintaining a healthy, balanced gastrointestinal microflora.

- **Daily probiotic insurance:** Vital-10® provides 10 different types of “friendly” bacteria that help support healthy gastrointestinal function. Developed for individuals who need a broad insurance formula for general intestinal support, Vital-10® is formulated to mimic the natural GI flora. This combination of synergistic strains provides wide coverage across both the small and large intestines, helping to maintain a healthy flora balance, promote synthesis of certain B vitamins and vitamin K, and support intestinal immune functions.
- **Free of common allergens:** Vital-10® is a hypoallergenic product that is free of common allergens including milk/casein, eggs, fish, shellfish, tree nuts, peanuts, wheat/gluten, corn, yeast, and soybeans. No sugar, magnesium stearate, maltodextrin, artificial sweeteners, colors, flavors, salicylates, or preservatives are used. Each probiotic species is grown on a special, vegetarian culture media without dairy components that are commonly used in many probiotic supplements. The probiotic blend is supplied in a base of inulin, a vegetable base derived from chicory root, and encapsulated in a vegetarian capsule.

Vital-10® is a cost-effective, multi-probiotic formula especially useful for maintaining probiotic balance in individuals with normal intestinal function. It can also be used after more aggressive probiotic replacement with higher potency or specific probiotic blends. This formula is provided in a maintenance-dose vegetarian capsule supplying 5+ billion CFUs. Vital-10® contains live microorganisms that are sensitive to warm temperature and moisture. Therefore, this product should be kept refrigerated with the lid tightly closed to maintain maximum potency.

**Suggested Use:** As a dietary supplement take one or two capsules daily with food or as directed by a healthcare practitioner.

This product was made in a GMP and ISO 9001:2008 registered facility.

### Supplement Facts

Serving Size 1 Capsule • Servings Per Container 100

#### Amount Per Capsule

Probiotic Blend (5+ billion CFUs)	29 mg*
<i>Lactobacillus acidophilus</i>	1.85+ billion CFUs*
<i>Bifidobacterium bifidum</i>	0.70+ billion CFUs*
Proprietary Blend of:	2.45+ billion CFUs*
<i>Lactobacillus rhamnosus,</i> <i>Lactobacillus plantarum,</i> <i>Bifidobacterium lactis,</i> <i>Lactobacillus salivarius,</i> <i>Lactobacillus bulgaricus,</i> <i>Lactobacillus casei,</i> <i>Lactobacillus brevis,</i> <i>Streptococcus thermophilus</i>	

\*Daily Value not established.

Other ingredients: Inulin base derived from chicory root, vegetarian capsule (hydroxypropyl methylcellulose, water), and L-leucine.
